SPRING 2013

*Chicken & Strawberry Salad*

**SALAD**

- 1 tablespoon sugar
- 2 tablespoon red wine vinegar
- 1 tablespoon water
- 1/8 teaspoon freshly ground pepper
- 2 tablespoons extra-virgin olive oil
- Wisk together.

**DRESSING**

- 4 cups romaine lettuce
- 4 cups arugula
- 2 cups quartered strawberries
- 1/3 cup vertically sliced red onion
- 12 ounces skinless, boneless rotisserie chicken breast, sliced
- 2 tablespoons unsalted cashews, halved
- 1/2 cup (2 ounces) crumbled blue cheese
- Drizzle dressing over salad and top with cashews and blue cheese.

# SPRING INTO SAVINGS!

Just like an annual tune-up for your heating system, annual air conditioning system maintenance is essential to keeping your system operating efficiently. Normal usage along with general wear and tear can make your HVAC system work harder; airborne dirt and debris can clog filters and affect proper operation. This can result in greater-than-normal wear on fans, motors, and moving parts within the system.

Are you interested in installing a NEW air conditioning system? We supply and install a wide range of reliable A/C systems including central air conditioning and mini-split ductless technologies to keep your home comfortable all summer long. The systems we carry are energy efficient and cost effective, helping to reduce your energy costs this summer!

**10% OFF**  
A/C SYSTEM TUNE-UP

Offer above can not be combined with any other offer. Offer expires 5/31/2013.

**\$200 OFF**  
A/C SYSTEM INSTALLATION

(Installation valued of \$2,000 or more!) Offer above can not be combined with any other offer. Offer expires 5/31/2013.

- Energy Efficient
- Utility Bill Savings
- Flexible & Quiet
- Ductless Technology
- 2013 Federal Tax Credits Available
- NJ State Rebates Available  
(www.njcleanenergy.com)

**Modern,  
Efficient &  
Affordable**

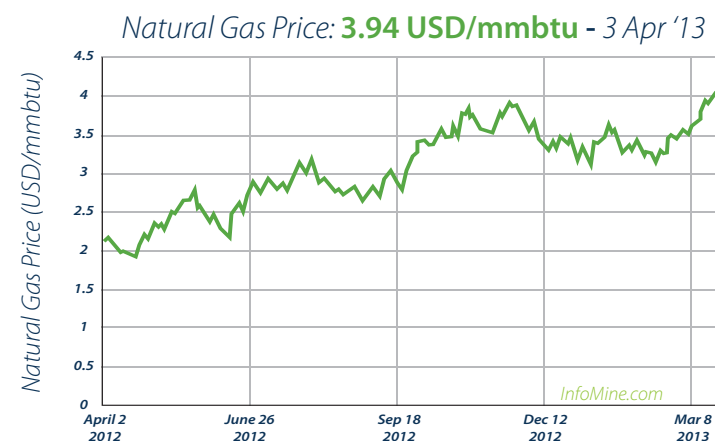

BEFORE you think about converting to natural gas  
**KNOW THE FACTS!**

### What Are the Hidden Costs?

- It frequently costs up to \$10,000 to convert from oil to gas.
- Did they tell you about the tank removal/disposal cost?
- Did they tell you about the cost to run the gas line?
- Did they tell you about the cost to line your chimney?

### Natural Gas Isn't Exactly Clean...Bioheat® Is!

- Natural gas is over 90% methane. Methane can be significantly more powerful than carbon dioxide in producing global warming.

### Oil Heat Gives You the Freedom of Choice...

- Once you convert to gas, the price you pay is determined by ONE provider. When their price goes up, your payments go up and **you have to go along for the ride.**

### Oil Heat is Efficient...

- Upgrading to a high efficiency oil heat system can be a fraction of the cost of converting to natural gas, and can save you up to 30% on your heating costs annually.

### So, If You Are Still Considering Switching to Natural Gas...

- Please call our office and we can answer any of your questions. We understand the facts and are experienced in installing all types of natural gas systems.

CALL US AT  
(609) 654-2188  
before you switch to natural gas

## IMPORTANT SAFETY INFORMATION

*about your oil heating system*

We care about the safety of all our customers; thus we would like to offer you a \$50 credit toward this important heating system upgrade. Most homeowners are unaware that fuel oil feed lines are made off copper and that bare copper can degrade when in direct contact with concrete due to a chemical reaction. This chemical process could lead to a potential failure or leak from your oil feed line. If this is the case, we can offer you a relatively easy fix. We would simply drain and abandon the old feed line and replace it with a new protected (coated) line.

Please call our office for more information.

**\$50 OFF FEED LINE  
UPGRADE**

Call us today at (609) 654-2188. Offer expires on 6/15/2013.
